GUIDE TO PERSONAL NAMES IN THE ON-LINE CATALOG

This section is a guide to individuals and families whose images are captured in these photographs and who are named in the titles given to the photographs. These people may not necessarily come from the places mentioned in the titles: the photographs were taken during the WWII years, and some people were working elsewhere in Pennsylvania or were in the armed forces. But it would appear that for the most part, the people pictured do come from the areas mentioned. (Many more FSA-OWI photographs include people, but no personal names appear in the titles.)
